Staff Contract Check Report 11-05-2014 06:15

PEP Transmissions require that employee assignments at school sites match contracts in payroll for your district's instructional staff. Normally the school site requires an employee to work prior to information being initialized in your payroll system. A consolidated district master schedule list will be produced once per year after school starts to provide the opportunity to check school site job assignments to payroll contracts eliminating DOE PEP and SIS audit errors. Please find this year's list below.
